

Transfer Factor ReCall®

TARGETED ACUITY

4Life®

"Hi! How are you? It's so good to see you, too." (Now, if I can only remember your name . . . you were a friend in school . . . or maybe we worked together at that place . . . what is your name?) "Where are you living now?" (Play for time . . . why isn't my husband helping me out here . . . didn't he get the signal? Maybe I'll remember . . . oh great . . . she remembers my name.)

It's times like this when sharpening your brainpower sounds pretty good! Not only does our memory enable us to recount names, dates or past events in our lives, it is also often associated with intelligence and increased effectiveness. While many people believe that gradual memory loss is simply a part of growing older, in reality it may be an indication of a more serious condition. Multiple studies have demonstrated that cognitive decline is NOT a normal part of aging and that there are a variety of risk factors associated with cognitive decline. In fact, researchers have suggested that some risk factors are similar to those for cardiovascular disease—what's bad for the heart is also bad for the brain.

Transfer Factor ReCall is formulated to give your brain the boost it needs. It includes patented Targeted Transfer Factor for superior immune system support—targeted specifically to the brain—as well as other ingredients known to affect the pathways associated with mental acuity and promote overall brain health.

Key Points

- **Supports Targeted System Health:** By targeting the superior immune-enhancing benefits of transfer factors, Transfer Factor ReCall provides unprecedented immune knowledge that benefits your brain, helping to strengthen the immune system against viruses that may cause inflammation and thereby increase blood flow and protect against aneurysms or other brain dysfunction. In addition, the antioxidant powers of n-acetylcysteine and ginkgo biloba help combat oxidative stress caused by free radicals, which is believed to contribute to premature aging and dementia. This complete formula helps reduce stress on the system so immune and oxygen components can work effectively, helping it to operate at a more efficient mode and direct energy toward the most critical need. So, rather than using energy to defend itself, the brain can focus its energy on optimal function.
- **Promotes Optimal Cognitive Function:** Transfer Factor ReCall combines some of the most potent ingredients known to support healthy cognitive function in people of all ages. Among many other significant health benefits, the biological actions of vinpocetine show that it enhances circulation and oxygen utilization in the brain, increases tolerance of the brain toward diminished blood flow, and inhibits abnormal platelet aggregation that can interfere with circulation or cause a stroke.

Phosphatidylserine (PS) is a naturally occurring phospholipid or "good fat" that is essential to the functioning of all cells in the body. Brain tissues are especially rich in PS, which functions as a brain cell regulator with regard to neurotransmission and synaptic communication, both key elements in maintaining memory, the ability to learn and sustained concentration.

Glycerophosphocholine and Huperzia serrata (Huperzine A) have been shown to enhance alertness, mental agility and recall. Huperzine A works by inhibiting the enzyme that breaks down acetylcholine, an important brain chemical for learning and memory. It has been reported that people with common brain dysfunction often have less than normal acetylcholine levels. Bacopa Monnieri supports the repair of damaged neurons in the brain and the creation of new neurons for improved memory and cognitive thinking.

Did You Know?

Approximately four million Americans have Alzheimer's disease, according to the Alzheimer's Association, and by 2050, 14 million Americans will suffer from the disease. In addition, one in 10 people over the age of 65 and nearly half of those over age 85 have Alzheimer's.

In a clinical trial to study the effects of vinpocetine in the treatment in acute ischaemic stroke, the National Institute of Health Stroke Scale score was significantly better in the vinpocetine treated group at three months of follow-up.

Feigin VL, Doronin BM, Popova TF, Gribatcheva EV, Tchervov DV: Vinpocetine Treatment in Acute Ischaemic Stroke. Department of Epidemiology and Preventive Medicine Institute of Internal Medicine Siberian Branch of the Russian Academy of Medical Science Novosibirsk. Eur J Neurol 2001 Jan;8(1):81-5.

Technical Points

- Magnesium from oxide is included to maximize nutrient absorption.
- Transfer Factor ReCall is the second Targeted Transfer Factor product from 4Life® and is backed by an exclusive patent (U.S. Patent 6,468,534) for obtaining specialized transfer factors from egg sources.

DIRECTIONS: Take three (3) capsules daily with 8 oz of fluid.

Serving Size: Three (3) Capsules
Servings Per Container: 30

Supplement Facts

Amount Per Serving		%DV
Magnesium (as magnesium oxide)	168 mg	42%
Targeted Transfer Factor	100 mg	**
<small>(A proprietary extract containing Targeted Transfer Factor from eggs)</small>		
Proprietary Blend	672 mg	**
<small>Vinpocetine</small>		
<small>Huperzia serrata extract (Huperzine A)</small>		
<small>Soy Lecithin (30% phosphatidylserine)</small>		
<small>Glycerophosphocholine</small>		
<small>N-Acetyl Tyrosine</small>		
<small>N-Acetyl Cysteine</small>		
<small>Bacopa monnieri Extract</small>		
<small>Lemon Balm Extract</small>		
<small>Ginkgo biloba Extract (24% ginkgo flavone glycosides, 6% terpene lactones)</small>		

*Reference Daily Intake (RDI)

**Daily Value (DV) not established
